Symptomatic influenza

Unvaccinated

Vaccinated

No symptomatic influenza

No health care use

GP consultation

Hospitalisation

Intensive care admission

Death

Vaccine – Jit – Figure 1
Vaccine – Jit – Figure 3

Influenza QALY loss
Vaccine efficacy (mother)
Vaccine cost
Vaccine administration cost
Cost of hospital visit
Cost of GP visit
Risk of hospital visit
Vaccine protection (infant)
Risk of GP visit (non-pregnant)
Hospitalisation QALY loss
Cost of ICU visit

Cost per QALY gained (£)

10000 20000 30000 40000
Vaccine – Jit – Figure 4

Incremental cost effectiveness ratio (£/QALY)

QALY loss due to clinical episode

Incremental cost effectiveness ratio (£/QALY)

Administration cost of vaccine (£)

With infant protection
Without infant protection
With second season protection
Vaccine – Jit – Figure 5

(a) Incremental cost-effectiveness ratio (£/EQALY gained) vs Final vaccination month

(b) Incremental cost-effectiveness ratio (£/EQALY gained) vs Final vaccination month
