Vaccine – Jit – Figure 2

Threshold willingness to pay (£/QALY) vs. Probability of being cost-effective (%)

- **Base case**
- **Without infant protection**
- **With second season protection**
Vaccine – Jit – Figure 3

Cost per QALY gained (£)

- Influenza QALY loss
- Vaccine efficacy (mother)
- Vaccine cost
- Vaccine administration cost
- Cost of hospital visit
- Cost of GP visit
- Risk of hospital visit
- Vaccine protection (infant)
- Risk of GP visit (non-pregnant)
- Hospitalisation QALY loss
- Cost of ICU visit
Vaccine – Jit – Figure 4

With infant protection
Without infant protection
With second season protection

Incremental cost effectiveness ratio (£/QALY)

QALY loss due to clinical episode

Administration cost of vaccine (£)

Incremental cost effectiveness ratio (£/QALY)
Figure 5: Incremental cost-effectiveness ratio (EQALY gained) for final vaccination month.
