Figure 12: High Impact Practices - Proven Interventions Can Address Leading Causes of Maternal Death

- Iron folate supplements
- Malaria intermittent treatment
- Insecticide-treated nets
- Anti-retrovirals
- Cesarean section
- Family planning
- Post-abortion care

Underlying Causes
- Unintended pregnancy
- Malnutrition
- Infections
- Non-communicable diseases

Hemorrhage 27%
Hypertensive disorder 14%
Other direct cause 10%
Maternal complications 11%
Sepsis 11%

- Uterococinics
- Blood transfusion
- Balloon tamponade
- Surgery
- Magnesium sulfate
- Calcium
- Aspirin
- Anti-hypertensives
- Cesareo-hypertensives
- Cesarean section
- Tetanus toxoid
- Clean delivery
- Antibiotics
- WASH

Medications for infection
Diet, supplementation, and fortification
