Appendix 1: Search strategies

RAPID RESPONSE SCHEMES

The search strategies were modified versions of those used by NICE in CG50 (2007). The searches were run on 21 October 2014 in Embase and MEDLINE, and limited to records added to the databases from December 2006 onwards.

<tr>
<td>1-</td>
<td>Meta-analyses, systematic reviews of RCTs, or RCTs with a high risk of bias</td>
</tr>
</tbody>
</table>
| 2++   | High-quality systematic reviews of case–control or cohort studies  
High-quality case–control or cohort studies with a very low risk of confounding, bias or chance and a high probability that the relationship is causal |
| 2+    | Well-conducted case–control or cohort studies with a low risk of confounding, bias or chance and a moderate probability that the relationship is causal |
| 2-    | Case–control or cohort studies with a high risk of confounding, bias, or chance and a significant risk that the relationship is not causal |
| 3     | Non-analytic studies (for example, case reports, case series) |
| 4     | Expert opinion, formal consensus |
Appendix 4: Data items extracted from papers

Study Type
- Study design
- Data collection method
- Study duration (observation, intervention and follow-up)

Population
- Number of participants
- Setting
- Age
- Gender
- Inclusion and exclusion criteria

Risk of bias
- Selection bias
- Performance bias
- Attrition bias
- Detection bias
- Other concerns about bias

Intervention type
- Aim, intervention and control details

Outcomes

**Rapid response schemes**

- Records identified through Embase (n = 1989)
- Records identified through MEDLINE (n = 2129)
- NICE guideline (n = 1)

Records after duplicates removed (n = 3093)

Records screened (n = 3093)

Full-text articles assessed for eligibility (n = 28)

Studies included in qualitative synthesis (n = 9)

Full-text articles excluded, with reasons (n = 19)
* Articles already in an included systematic review article (n=11)
* No statistical analysis (n=2)
* No comparison group (n=1)
* Retrospective (n=4)
* Non-systematic review (n=1)
Early warning scores

Identification

Records identified through Embase (n = 2064)
Records identified through MEDLINE (n = 2086)
NICE guideline (n = 1)

Records after duplicates removed (n = 3267)

Screening

Records screened (n = 3267)

Records excluded (n = 3247)

Eligibility

Full-text articles assessed for eligibility (n = 20)

Studies included in qualitative synthesis (n = 8)

Included

Full-text articles excluded, with reasons (n = 12)

* Validation not implementation (n = 2)
* Descriptive (n = 2)
* Abstract only (n = 1)
* Non-systematic review (n = 3)
* Retrospective audit (n = 1)
* Single parameter system (n = 1)
* Included in existing systematic review (n = 2)
Standardised handover tools

Records identified through Embase (n = 1689)

Records identified through MEDLINE (n = 730)

Records after duplicates removed (n = 1876)

Records screened (n = 1876)

Records excluded (n = 1845)

Full-text articles assessed for eligibility (n = 31)

Full-text articles excluded, with reasons (n = 19)

* Handover not on ward (n=3)
* No statistical tests (n=1)
* Sample size unclear (n=1)
* No control group (n=2)
* Non-systematic review (n=6)
* Descriptive only (n=1)
* Paediatrics focus (n=1)
* Handover minor (n=1)
* No intervention (n=2)
* Retrospective (n=1)

Studies included in qualitative synthesis (n = 12)
Continuing education

Identification

Records identified through Embase (n = 1470)

Records identified through MEDLINE (n = 1475)

Records after duplicates removed (n = 2180)

Screening

Records screened (n = 2180)

Records excluded (n = 2161)

Eligibility

Full-text articles assessed for eligibility (n = 19)

Full-text articles excluded, with reasons (n = 16)

*Teaching topic not relevant (n=5)

*No statistical tests (n=1)

*Results not reported numerically (n=1)

*Descriptive (n=4)

*Articles already in an included systematic review (n=3)

*No comparison group (n=2)

Included

Studies included in qualitative synthesis (n = 3)
