Figure 1. Kaplan Meier curves for time to event for primary outcome and composite safety outcome.
Figure 2. Kaplan Meier plots of time to death following a) primary outcome, b) safety outcome.

- **Death after primary outcome**
  - 1-year mortality: 21.9% (95% CI, 18.7% to 25.7%)
  - Number at risk:
    - Standard: 319, 224, 183, 140, 105
    - Intensive: 243, 170, 136, 113, 90

- **Death after composite safety outcome**
  - 1-year mortality: 7.5% (5.8% to 9.6%)
  - Number at risk:
    - Standard: 406, 317, 244, 183, 140
    - Intensive: 521, 427, 349, 274, 210

Number at risk
