The authors regret that the reported non-synonymous mutation L550V in the PfCPhers gene is a synonymous mutation. We would like to correct this information in the manuscript.

The authors would like to apologies for any inconvenience caused.

Discussion, second paragraph, this sentence can be omitted “From these observations, we speculate that for new antimalarial compounds acting on the PfCPhers gene, acquired resistance may occur more rapidly …”. L550V should be omitted from Tables 1 and 2 and Suppl. Table 1.
