

Table 3: Suicidality profile comparison of adult community residents and facility attendees, in PRIME implementation areas in Ethiopia, India and Nepal, 2013-2014.

	Community residents (N=6689) N (%)	Facility attendees (N=3251) N (%)	Prevalence difference for facilities compared to communities (%)	95% CI
Suicidal ideation	543 (8.1)	334 (10.3)	+2.2*	+0.9 to +3.4
Suicide planning	123 (1.8)	128 (3.9)	+2.1*	+1.4 to +2.8
Suicide attempts	82 (1.2)	71 (2.2)	+1.0*	+0.4 to +1.5

Note: Prevalence difference and 95% CI estimated using the two-sample test of proportions; *P≤0.05
