

e-Appendix 4

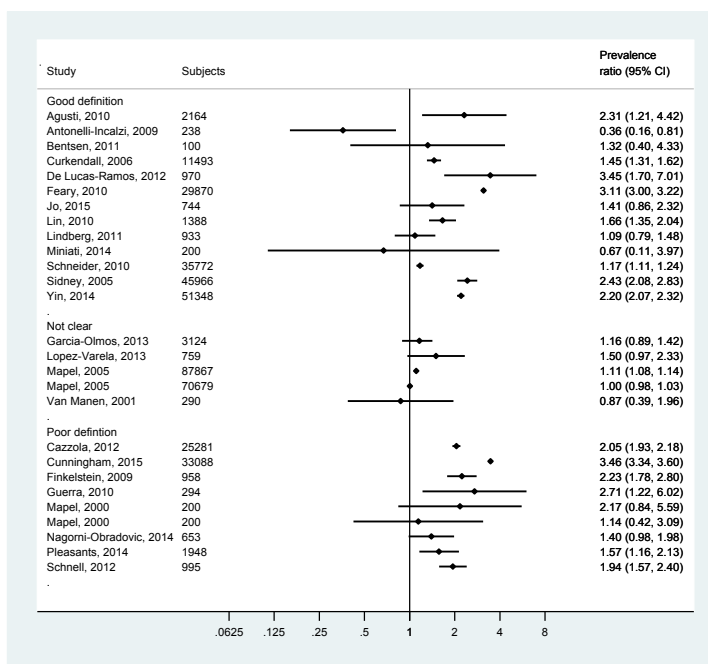

Additional forest plots

Figure A4.1 Forest plot showing estimates of the prevalence ratio (PR) for stroke comparing people with and without COPD, grouped according to population characteristics

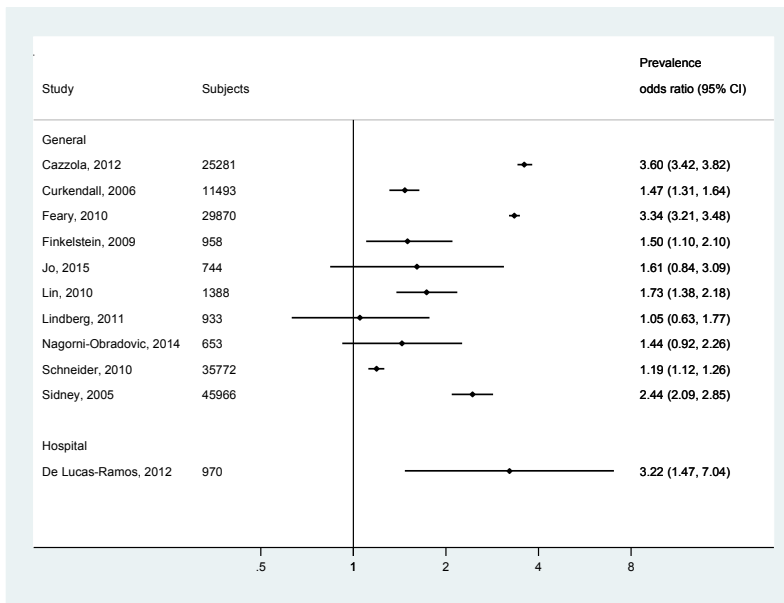

Note: Subjects = number of study participants with COPD.

Figure A4.2 Forest plot showing estimates of the prevalence ratio (PR) for stroke comparing people with and without COPD, grouped according to quality of COPD case definition

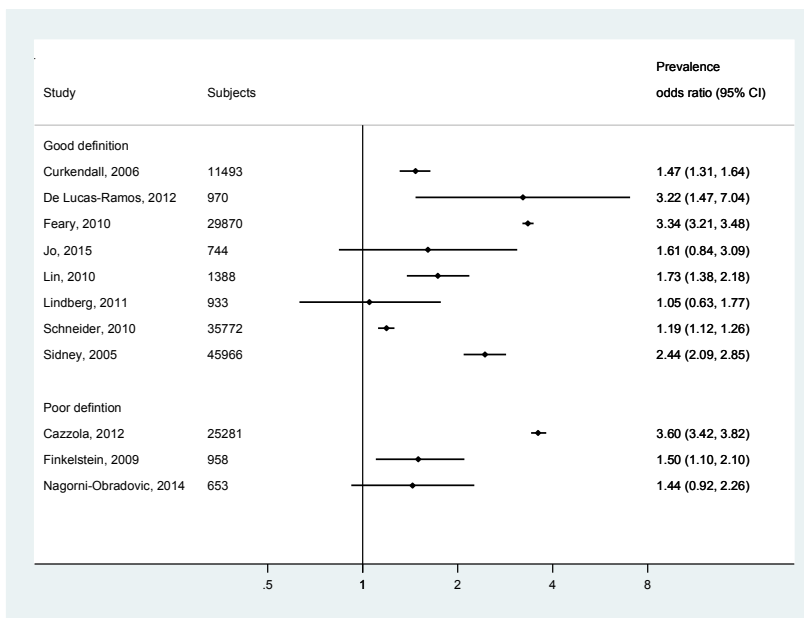

Note: Subjects = number of study participants with COPD.

Figure A4.3 Forest plot showing estimates of the prevalence odds ratio (POR) for stroke comparing people with and without COPD, grouped according to population characteristics

Note: Subjects = number of study participants with COPD.

Figure A4.4 Forest plot showing estimates of the prevalence odds ratio (POR) for stroke comparing people with and without COPD, grouped according to quality of COPD case definition

Note: Subjects = number of study participants with COPD.
