

IMPRINT-Routine vaccines during COVID-19 FOLLOW UP 2021 SURVEY

This is a follow up 2021 survey on routine vaccine services for pregnant women, neonates and infants in times of COVID-19. We are aiming to evaluate the current status of routine vaccine services for pregnant women and children during the COVID-19 pandemic.

This is a IMPRINT members-only survey, circulated via the members' email addresses which were consented to be shared with the network at the time when members joined the network.

No personal data is being collected, all responses are considered anonymous and the data will be held in line with General Data Protection Regulations.

Completion is entirely voluntary.

By continuing and completing this survey you understand that your answers will be treated anonymously but may contribute towards an IMPRINT network publication evaluating current vaccine services for pregnant women and children.

*Required

1. Do you agree to complete this survey? You understand that your answers will be treated anonymously but may contribute towards an IMPRINT network publication evaluating current vaccine services for pregnant women and children? *

Mark only one oval.

Yes *Skip to question 3*

No *Skip to question 2*

No consent given

2. I confirm I do not want to complete this survey *

Mark only one oval.

- Yes I do not want to complete
- I agree to complete this survey and understand that my answers will be treated anonymously but may contribute towards an IMPRINT network publication evaluating current vaccine services for pregnant women and children. *Skip to question 3*

Background

3. Did you complete the IMPRINT routine vaccine survey during the COVID-19 pandemic in April 2020? *

Mark only one oval.

- Yes
- No
- Can't remember

4. Which country are you reporting from? *

5. What is the most fitting description of your job (if 'Other' please specify)? *

Mark only one oval.

- Healthcare Professional (doctor, nurse, midwife; hospital- or community-based)
- Public Health official
- Laboratory-based Researcher/Scientist
- Social Scientist
- Other: _____

6. Is any part of your role involved in delivering or monitoring routine maternal, neonatal and infant vaccine programmes in the country where you are based?
Please give details
-

Routine Maternal Vaccine Disruption

7. Is there any current disruption to maternal vaccine service delivery due to COVID-19 in the country where you are based? *

Mark only one oval.

- Yes *Skip to question 8*
- No - maternal vaccine service delivery was initially affected but no ongoing disruption *Skip to question 8*
- No - maternal vaccine service delivery has not been disrupted by the pandemic *Skip to question 11*
- Don't know *Skip to question 11*

Reasons for maternal vaccine disruption

8. Please choose from the options below as to why maternal vaccine services have been disrupted where you are based (Please tick all that apply and if 'Other' please describe): *

Tick all that apply.

- Logistical vaccine supply issues due to COVID-19 lockdowns/pandemic response
- Lack of transport services or access to vaccine services due to COVID-19 lockdowns/pandemic response
- Medical supplies (including PPE) shortages affecting health services
- Cancellation of routine vaccine clinics due to COVID-19
- Lack of staff for vaccine clinics due to staff sickness, isolation or redeployment
- Parental anxiety about spread of COVID-19 infection when attending routine vaccination appointments
- Parental confusion about whether routine vaccine services operating
- I do not know the reasons but I know vaccine services have been disrupted

Other: _____

9. Has there been any reported drop in uptake of maternal vaccines where you are based since the start of the COVID-19 pandemic? *

Mark only one oval.

- Yes
- No - maternal vaccine uptake was initially affected but no ongoing disruption
- No - maternal vaccine uptake has not been affected
- Don't Know

10. Please give any relevant further details regarding disruption to routine maternal vaccine services and uptake

Routine neonatal, infant and childhood vaccine disruption

11. Is there any current disruption to neonatal, infant and childhood vaccine service delivery due to COVID-19 in the country where you are based? *

Mark only one oval.

- Yes *Skip to question 12*
- No - childhood vaccine service delivery was initially affected but no ongoing disruption *Skip to question 12*
- No - childhood vaccine service delivery has not been disrupted by the pandemic *Skip to question 15*
- Don't know *Skip to question 15*

Reasons for neonatal, infant and childhood vaccine disruption

12. Please choose from the options below as to why childhood vaccine services have been disrupted (please tick all that apply and if 'Other' please describe) *

Tick all that apply.

- Logistical vaccine supply issues due to COVID-19 lockdowns/pandemic response
- Lack of transport services or access to vaccine services due to COVID-19 lockdowns/pandemic response
- Medical supplies (including PPE) shortages affecting health services
- Cancellation of routine vaccine clinics due to COVID-19
- Lack of staff for vaccine clinics due to staff sickness, isolation or redeployment
- Parental anxiety about spread of COVID-19 infection when attending routine vaccination appointments
- Parental confusion about whether routine vaccine services operating
- I do not know the reasons but I know vaccine services have been disrupted
- Other: _____

13. Has there been any reported drop in uptake of childhood vaccines where you are based since the start of the COVID-19 pandemic? *

Mark only one oval.

- Yes
- No - childhood vaccine uptake was initially affected but has now stabilised
- No - childhood vaccine uptake has not been affected
- Don't know

14. Please give any relevant further details regarding disruption to routine childhood vaccine services and uptake

Guidelines and adaptations to maintain routine vaccine services during the COVID-19 pandemic

15. Please describe any local and/or national adaptations or innovations you are aware of to maintain the delivery of maternal and childhood vaccine services over the last year.

16. Has any guidance on the delivery of regular (maternal and/or childhood) immunisation services during the COVID-19 pandemic been issued at the local level? *

Mark only one oval.

- Yes
- No
- Don't know

17. Has any guidance on the delivery of regular (maternal and/or childhood) immunisation services during the COVID-19 pandemic been issued at the national level? *

Mark only one oval.

- Yes
- No
- Don't know

18. Please share details of any local and/or national guidelines for maternal and childhood vaccine delivery (including any useful links):

19. Has guidance on maintaining routine (maternal and/or childhood) immunisations changed since the start of the COVID-19 pandemic? *

Mark only one oval.

- Yes
- No
- Don't know
- Other: _____

20. If yes - please give details

21. Has any information been communicated to pregnant women, parents or families at the local level regarding attending regular immunisation services during the COVID-19 pandemic? *

Mark only one oval.

- Yes
- No
- Don't know

22. Has any information been communicated to pregnant women, parents or families at the national level regarding attending regular immunisation services during the COVID-19 pandemic? *

Mark only one oval.

- Yes
- No
- Don't know

23. Please share details of any local and/or national communication with pregnant women, parents or families regarding regular immunisation services during the COVID-19 pandemic (including any useful links):

24. Has the COVID-19 vaccine roll out where you are based impacted on routine (maternal and/or childhood) vaccine service delivery? *

Mark only one oval.

- Yes
- No
- Maybe
- Don't know

COVID-19 vaccination

25. Are pregnant women in the country where you are based recognised as a priority group for COVID-19 vaccines? *

Mark only one oval.

- Yes
- No
- Don't know

26. In the country where you are based what are the guidelines regarding pregnant women and COVID-19 vaccination? *

Mark only one oval.

- Excluded - pregnant women are not being vaccinated against COVID-19
- Recommended for SOME pregnant women at higher risk of contracting or being severely ill with COVID-19 (eg healthcare workers or having underlying health conditions)
- Recommended for SOME pregnant women based on other criteria such as when their age group becomes eligible within the national vaccine program
- Recommended for all pregnant women regardless of age or other risk factors
- No specific guidance regarding vaccination of pregnant women
- Don't know
- Other: _____

27. Are COVID-19 vaccines recommended in the country where you are based for breastfeeding women: *

Mark only one oval.

- Yes - any breastfeeding woman can be vaccinated
- Yes - some breastfeeding women based on clinical or occupational risk factors for COVID-19
- Excluded - breastfeeding women are not being vaccinated
- No specific guidance about COVID-19 vaccination and breastfeeding
- Don't know
- Other: _____

28. Any further comments about your experiences of COVID-19 vaccination programmes where you are based for pregnant and breastfeeding women?

29. Thank you for completing this survey - please add any other comments below you think might be relevant
